

**There is an ongoing product development initiative to phase out open style GTG clamps (980) and move to a closed style (980C). This is occurring at an uneven pace. Meaning, depending upon the type or color the conversion may or may not have occurred. Glass fabrication IS different from one to the other. Please consult the price list, CrystalSoft or Online ordering to see what is currently available.

Signature Series 980c
Panel Clamp
180 GTG Closed Option
