

PARKLANE

BY-PASS

The Parklane By-Pass is a sleek, framed bath enclosure engineered for strength, beauty and easy maintenance. The header design – an elegantly simple rounded profile – adds an architectural elegance to the strength and overall design values of the Parklane By-Pass. One of the key values of the Parklane is its ease of cleaning, due to the exclusive “Free Flow” sill track system that has no obstructions but still provides positive door traction. Polished towel bars and brackets provide a smooth touch of elegance. The Parklane By-Pass is available in standard or custom sizes, with silver, gold, brushed nickel or oil-rubbed bronze finishes and a variety of glass patterns.
