

PARKLANE

PIVOT

The Parklane Pivot Door is our most versatile swing door . . . and that versatility can work for you. The Parklane Pivot has a full 2 1/4" horizontal adjustment, two heights, eight different widths ranging from 22" to 36", six metal finishes and a wide range of glazings and KD options. Plus, the door is reversible for right or left hand operation.

The reduced swing radius of the Parklane Pivot Door makes it ideal for tight locations. The full length magnetic latch system has an adjustable strike jamb for a custom, leak-proof seal.

The quality craftsmanship of the Parklane Pivot Door is seen in its heavy duty extrusions and in such engineering details as the easy-to-install, two-piece drip sweep system that efficiently keeps water inside the shower.

PARKLANE

H I N G E

The Parklane Hinge Door blends quality materials with smart design. This single door application is available in silver, brushed nickel and oil-rubbed bronze, or can be ordered in specialty colors. The Parklane Hinge is offered KD and glazed with clear, aquatex and pattern 62 or with custom specialty glass. This door comes in widths from 23" to 32" and three heights. Custom units are a specialty.

Installation is easy thanks to the -0 to +1 1/2" adjustment; reversible door for right or left hand operation; 3/4" out of square adjustment on each wall; and two-piece drip system for efficient drainage.

The exclusive SEALPRO continuous internalized hinge makes for a smooth, quiet swing. By placing a plastic sleeve between the metal parts, it eliminates wear and vibrations.
